

quick survey results

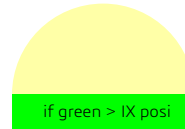

(vertical - ages 0-80)

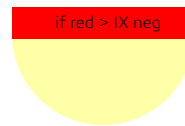

above - green "yes" and red "no" graph areas could also represent the results of visitors willingness to share/exchange knowledge (the third voting wall question)

HAMBURGER INTERACTION CHART

(two-part questionburger = one quick survey result)

TOP-HALF
did u interact?

BOTTOM-HALF
did u want to?

combining salad-salad (green layers) burgers and we combine the lost interaction gaps

NOT salad-tomato (red layers) burgers because some surveyees werent willing to interact more

if enough data > combine top half and lower half salad burgers = possible interactions

"data shows we should combine students and retired people in interactive ways"

"ooh data shows we should combine people who are unemployed with employed people!"

"ooh data shows we should combine people who are unemployed, retired people and employed people"
